GitHub: <https://github.com/hardhiksai05>

Email: hardhiksai21@gmail.com
Mobile: +91 7207128747

SKILLS

Languages:	C/C++, Python, SQL , C
Databases:	MySQL, PL/SQL, DBMS
Tools/Platforms:	Excel, Power BI, VSCode, Git, GitHub
Core Concepts:	Data Structures & Algorithms, Operating System, OOPS, DBMS, Computer Networks
Soft Skills:	Leadership, Team Player, Adaptability, Perseverance

PROJECTS

Telegram AI Bot GitHub	<i>Apr 2025</i>
- Developed an AI-powered Telegram assistant using the Google GenAI SDK to provide intelligent text-based responses and content analysis. - Implemented multimodal analysis for images, PDFs, and code/text files, allowing users to upload content and receive AI-generated explanations, summaries, and insights directly in Telegram. - Designed a structured response system with adaptive formatting, concise explanations, code analysis, and context-aware answers for different types of user requests. - Deployed the serverless backend using Vercel with secure API-key configuration and asynchronous Telegram webhook processing. Tech: Python, Google GenAI SDK, Telegram Bot API, Vercel, GitHub	
AI Image Recognition System GitHub	<i>Nov 2025</i>
- Full-stack system for real-time image analysis and monitoring. - Integrates YOLO11 for detection and Gemini for contextual insights. - Deployed on Render with Supabase storage and Cloudinary media handling. Tech: Python, FastAPI, React, YOLO, Gemini, Supabase, Cloudinary	
Facial Emotion Detection System GitHub	<i>Oct 2025</i>
- Developed a real-time facial expression detection system using a webcam to classify emotions such as happy, sad, angry, fear, surprise, disgust, and neutral. - Applied face detection, facial cropping, confidence filtering, and temporal smoothing for more stable predictions. - Built a real-time interface displaying detected faces, emotion confidence scores, and FPS. Tech: Python, DeepFace, TensorFlow, OpenCV	

TRAINING

Artificial Intelligence and Machine Learning	<i>Apr 2026 – Jun 2026</i>
- Completed structured training covering core concepts including Python, machine learning, computer vision, AI APIs, and model integration. - Developed practical skills through implementing AI solutions using OpenCV, YOLO, Gemini API, and OpenRouter for image analysis, object detection, and conversational AI. - Designed and developed AI-based applications including a Telegram AI bot, image recognition and monitoring system, and face recognition attendance system with database and cloud integration.	

CERTIFICATES

Fundamentals of Machine Learning (link)	<i>Feburary 2026</i>
Introduction to Artificial Intelligence (link)	<i>March 2026</i>
Programming Fundamentals using Python (link)	<i>July 2026</i>

ACHIEVEMENTS

- Solved **100+ DSA problems** across LeetCode, GeeksforGeeks, and HackerRank.
- Earned **5-star rating in Python** on HackerRank.
- Built and deployed **3+ AI-based applications** involving computer vision, machine learning, and AI APIs.

EDUCATION

Lovely Professional University <i>Bachelor of Technology - Computer Science and Engineering; CGPA: 9.2</i>	Phagwara, Punjab <i>Since Aug 2025</i>
Sasi Junior College <i>Intermediate; Percentage: 97</i>	Rajahmundry, Andhra Pradesh <i>Apr 2022 - Mar 2025</i>
The Future Kid's School <i>Matriculation; Percentage: 87</i>	Rajahmundry, Andhra Pradesh <i>Apr 2021 - Mar 2022</i>
